### Overview

I'm a Front End Developer from Lisbon and currently living in Utrecht, The Netherlands. I'm passionate about clean code and how I can make projects and businesses gaining life using my skills. In my free time I like to take photos, a hobby that makes me look for detail, play some games and keep updated with my skills while developing side projects.

### Skills

- HTML
- CSS/Sass
- JavaScript
- Vue.Js, nuxt
- Git/GitHub
- Jira, Gulp, Npm

### Languages

Portuguese  
English

### Professional experience

**Studio Naam** 06/01/2020 - actual

- Change the developing system to a more scalable and easier maintainable projects based on company stack.
- With a team of 2 developers I acquired more responsibility on company projects which led me to learn how to deal with more pressure and manage time tasks.
- Improved my skills on how to kickstart projects and set up the whole development base.

## **FullSix Portugal** 01/2018 - *actual*

- Build website for clients, including an ecommerce
- Consolidate Front-End Skills, like Javascript, Css/Sass and HTML
- Learned Modular System and design System
- Learned to work in a high paced environment

## **Dimensão Global** 08/2017 – 11/2017

- Front-End Developer Internship
- Learned Sass
- Built websites using wordpress
